PROFESSIONAL PROFILE

Results-driven operations and administrative professional with 7+ years of hands-on experience at a federal government institution, where I single-handedly managed an entire department section, drafted legal case findings, conducted formal hearings, and coordinated with officers across multiple disciplines. Matric-qualified but entirely self-taught beyond that — holding a Google Project Management Certificate and META Front-End Development Certificate earned through independent study. Currently building Python development skills through structured daily training. Proven ability to learn fast, take full ownership of complex responsibilities, and deliver professional-quality output without needing a degree to validate capability. Fluent in English and Urdu. Learning Japanese.

SKILLS

Administration	Legal Document Drafting, Case Finding Writing, Hearing Coordination, Records Management, SOP Development, Compliance Documentation
HR & People	Team Coordination, Onboarding & Offboarding, Attendance & Leave Tracking, Multi-discipline Stakeholder Management, Conflict Resolution
Project Management	End-to-end Workflow Ownership, Deadline Management, Cross-functional Coordination, Risk Identification, Reporting & Analytics
Technical	Python (in active training), HTML5, CSS3, JavaScript, Git, GitHub, Linux CLI (learning), Command Line basics
AI-Assisted Work	Prompt Engineering, AI-augmented document drafting, Workflow automation using LLM tools, Research acceleration via AI
Tools	MS Word, MS Excel (Pivot Tables), MS Outlook, MS PowerPoint, Google Workspace, CMIS, Notion
Languages	English (Professional), Urdu (Native), Japanese (Learning — Hiragana & basic phrases)

WORK EXPERIENCE

Lower Division Clerk — Administration, Legal & Operations

Wafaqi Mohtasib Secretariat (Federal Ombudsman of Pakistan) • 2017 – 2024 • Islamabad

- Solely managed all administrative and operational functions of an entire department section — handling incoming cases, routing correspondence, maintaining records, and ensuring uninterrupted daily operations without additional support.
- Drafted legal Findings of cases — formal written determinations based on evidence, hearings, and applicable law — producing documentation that required precision, legal comprehension, and clear professional writing to institutional standards.
- Conducted and coordinated formal hearings with senior officers and external stakeholders — prepared hearing agendas, managed proceedings, recorded outcomes, and ensured all documentation met regulatory requirements.
- Coordinated directly with officers of varying seniority and expertise — legal officers, administrative staff, and department heads — managing communication, documentation flow, and task handoffs across disciplines.
- Maintained and organized a high-volume case management system (CMIS) — tracked thousands of concurrent active files, performed regular audits, corrected discrepancies, and ensured audit-ready record integrity at all times.
- Supervised and guided junior data entry staff — assigned tasks, verified output quality, trained on institutional procedures, and maintained consistent team productivity under daily operational demands.

- Managed all HR-adjacent functions for the section: attendance, leave tracking, staff record updates, and onboarding documentation for incoming personnel.
- Prepared weekly, monthly, and quarterly reports for departmental leadership — compiled case statistics, resolution timelines, and operational metrics from CMIS into clear, decision-ready summaries.
- Handled all official correspondence on behalf of the section — drafted, reviewed, and dispatched formal letters, internal memos, and inter-departmental communications to government and public stakeholders.

TECHNICAL PROJECTS

Calculator App — [umairjailani.github.io/Calculator Project/](https://umairjailani.github.io/Calculator%20Project/)

JavaScript calculator — arithmetic operations, clean responsive UI.

Simon Game — umairjailani.github.io/Simon-Game/

Full browser memory game — progressive difficulty, sound, animations, game-over logic.

Drum Machine — umairjailani.github.io/Drum-on-keys/

Keyboard-triggered drum pad using JS event listeners and Web Audio API.

To-Do List App — umairjailani.github.io/ToDoList-Project/

Task manager with add, complete, and delete — clean persistent UI.

Login Page UI — umairjailani.github.io/Login_page/

Responsive login form with client-side validation and CSS styling.

Portfolio Website — umairjailani.github.io

Personal developer portfolio — all projects live on GitHub Pages.

EDUCATION

Matriculation — SSC

Pakistan

All professional and technical skills beyond Matric are self-taught through independent study, structured online courses, and 7+ years of applied professional experience.

CERTIFICATIONS

Google Project Management Certificate — Google / Coursera

META Front-End Development Certificate — Meta / Coursera

100 Days of Code – Python Bootcamp — Udemy (in progress)
